Software Requirement Specification Quality Analysis Report

Generated By: SRSentinel AI

Technology: NLP + Machine Learning + Explainable AI

Prediction Summary

Prediction	High Quality
Confidence	86.0%
Confidence Level	High
Quality Score	75/100
Percentage	75.0%
Grade	B
Status	Good

Requirement Statistics

Metric	Count
Total Requirements	20
Functional Requirements	6
Non Functional Requirements	2
Other Requirements	12

Ambiguity Analysis

Metric	Value
Ambiguous Words	5
Severity	Medium
Ambiguity Score	50

Explainable AI Analysis

Positive Indicators

- Overall SRS quality score is high.

- Functional requirements are clearly identified.
- Non-functional requirements are present.

Negative Indicators

- 5 ambiguous terms detected.

AI Explanation

The SRS is predicted as High Quality. The quality score is 75/100. The document contains 6 functional and 2 non-functional requirements.

Feature Importance

Feature	Value
Quality Score	75
Ambiguity Count	5
Functional Requirements	6
Non Functional Requirements	2

Improvement Suggestions

- State measurable improvement criteria.
- Define measurable usability requirements.
- Specify an exact response time (e.g., within 2 seconds).
- Replace with measurable quality attributes.
- Specify the exact number instead of using 'many'.
- Functional Requirement coverage is satisfactory.
- Consider adding more Non-Functional Requirements.

Best Practices

- Use clear and concise language.
- Avoid vague and subjective words.
- Write measurable and testable requirements.
- Separate Functional and Non-Functional Requirements.
- Ensure every requirement is complete and consistent.
- Specify performance, security and reliability constraints.
- Review the SRS document regularly.

Quality Improvement Checklist

- ✓✓ Remove ambiguous words.

- ✓✓ Write measurable requirements.
- ✓✓ Include both Functional and Non-Functional Requirements.
- ✓✓ Use 'The system shall...' wherever applicable.
- ✓✓ Review the document before implementation.

Extracted SRS Document

SRS Document 3: Online Shopping System

1. Introduction

The Online Shopping System allows customers to browse products, place orders, and make payments online.

2. Functional Requirements

FR1: The system shall allow users to create accounts.

FR2: The system shall display product information and prices.

FR3: The system shall allow customers to add products to the shopping cart.

FR4: The system shall process online payments.

FR5: The system shall track order delivery status.

3. Non-Functional Requirements

NFR1: The system should be fast.

NFR2: The system should be easy to use.

NFR3: The system should provide better security.

NFR4: The system should handle many users.

4. Additional Notes

The application must work properly and provide good performance.
